

# The EPATEE project

What we can learn from  
existing evaluation practices

---

Final EPATEE Conference

19<sup>th</sup> September 2019, Paris

This project has received funding from the  
European Union's Horizon 2020 Research and  
innovation programme under grant agreement No 746265.

“Developed tool is good and easy to use!”

“Coming from renewables I realised that (policies addressing) awareness, motivations and attitudes of final consumers are crucial (for a successful energy transition)”

“EPATEE reconfirmed the growing need for evaluations and their timely planning.”

“The tool would work also in long term provided that there will be new material coming in...”

---

“There is a lot more to share than we thought. It's sometimes hidden. EPATEE helped to gather these resources!”

“Good evaluation guidance results in better informed decisions and saves more energy for less money.”

“To put in front of the scene the issue of evaluation of energy efficiency policies, which is of the utmost importance :

- First due to the key role of energy efficiency policy for climate issues,
- Second due to the impact of Article 7 EED in the size of those policies, with for example a present cost/value of 4 Billions euros a year for the French White Certificates”

“To put somewhere in a repository all necessary information about evaluation of energy efficiency policies :

- An index of all the evaluation conducted and description of some main ones
- A guide through the evaluation choice that can be made”
