

EPATEE

- Evaluation into Practice to Achieve Targets for Energy Efficiency -

*Horizon 2020 work program:
Engaging and activating public authorities*

- *Raising the capacity of Member States to fulfil their obligation under the:*
- *Energy Efficiency Directive,*
 - *Energy Performance of Buildings Directive,*
 - *Ecodesign and Labelling Directives*

This project has received funding from the European Union's Horizon 2020 Research and innovation programme under grant agreement No 746265.

EPATEE's objectives

The specific objectives of the project are to create the favourable conditions for **improving the number and effective use** of ex-post impact **evaluations** of energy efficiency policies.

The main general concept of EPATEE is that improving key stakeholders' evaluation practices help **bridging the gap between** their **need** for effective policy making and their **lack of data and analysis** about the impacts.

EPATEE's idea

1. ASSESS and COMPARE

needs, expectations and existing evaluation practices

2. IMPROVE

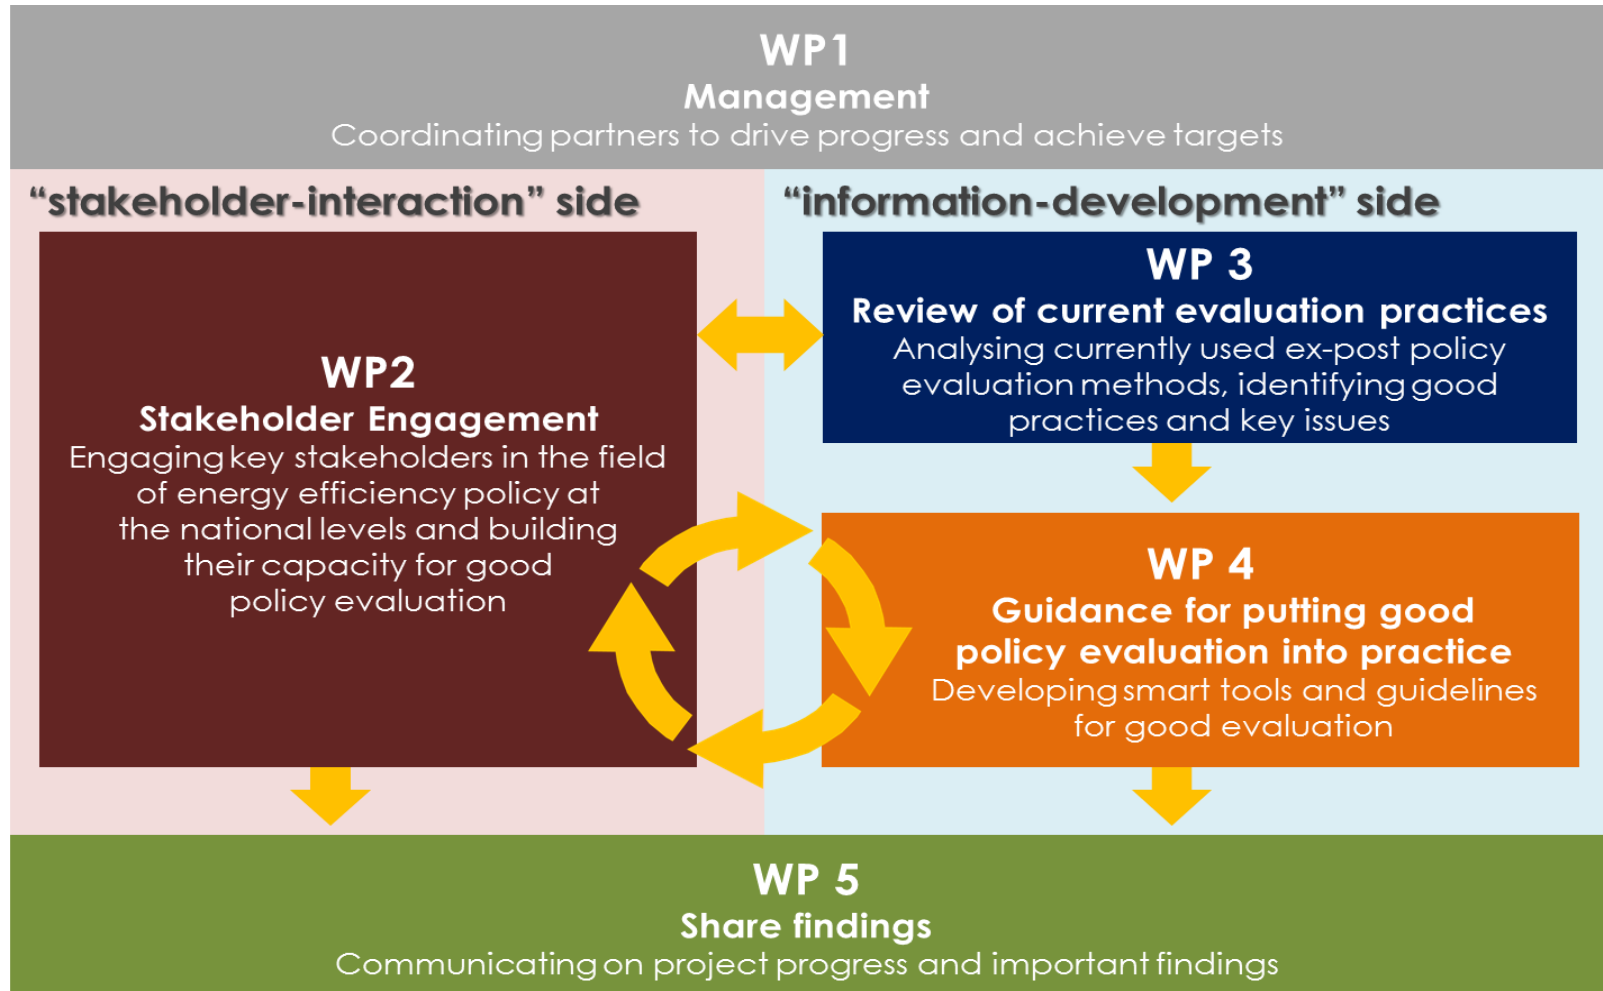

policy makers' perception on the significance of evaluations for proper policy designs and the application of evaluations in energy efficiency policy practice

3. ENABLE

stakeholders to conduct best practice evaluations by promoting knowledge exchange between stakeholders through peer-learning workshops, webinars, and direct support

EPATEE's work programm

EPATEE's activities

- conduct European and national peer-learning workshops on good policy evaluation practices in different European cities
- offer webinars on good policy evaluation practices
- provide overview on main issues and gaps of existing evaluations
- present cases on available evaluations
- report on good evaluation practices
- give guidance on integrating evaluations into policy practice
- set up an online-toolbox for evaluations

Access to EPATEE's knowledge

- project website: www.epatee.eu
 - press releases on events and results
 - newsletters on new insights
 - presentation of experiences and resources on evaluation knowledge to a national and/or European audience
 - presentation of results in conferences

EPATEE's project team

Logo	Project Partners	Location
	AEA (Österreichische Energieagentur - Austrian Energy Agency)	Austria

The EPATEE peer-learning workshops – what?

Four European and six national peer-learning workshops on good policy evaluation practices

Purpose

- Identify the main issues related to policy evaluation practice
- build the capacity of policymakers and implementers
- develop and strengthen national networks of experience & information sharing

Content

- presentations from project partners and/or experts in policy evaluation practices
- illustrations of good practices
- allow participants to discuss the topics of interest

Target – follow-up to the workshops

- emergence of groups with similar issues and topics of interest (e.g. calculation methods used in EEOs, rebound effect, gaps between estimated and observed energy consumption data, the collection of data)
- EPATEE will connect these groups (“Clubs”) and facilitate ongoing exchange

The EPATEE peer-learning workshops – where?

Four European peer-learning workshops on good policy evaluation practices

- October 2017
- First half of 2018
- Second half of 2018
- First half of 2019

Six national peer-learning workshops on good policy evaluation practices (all in 2019)

- Vilnius
- Paris
- Berlin
- Zagreb
- Vienna
- Helsinki
