

Presentation and discussion of the design of the EPATEE knowledge base

1st European Peer Learning Workshop
3 October 2017, Paris

Barbara Schlomann, Barbara Breitschopf, Fabian Voswinkel

This project has received funding from the
European Union's Horizon 2020 Research and
innovation programme under grant agreement No 746265.

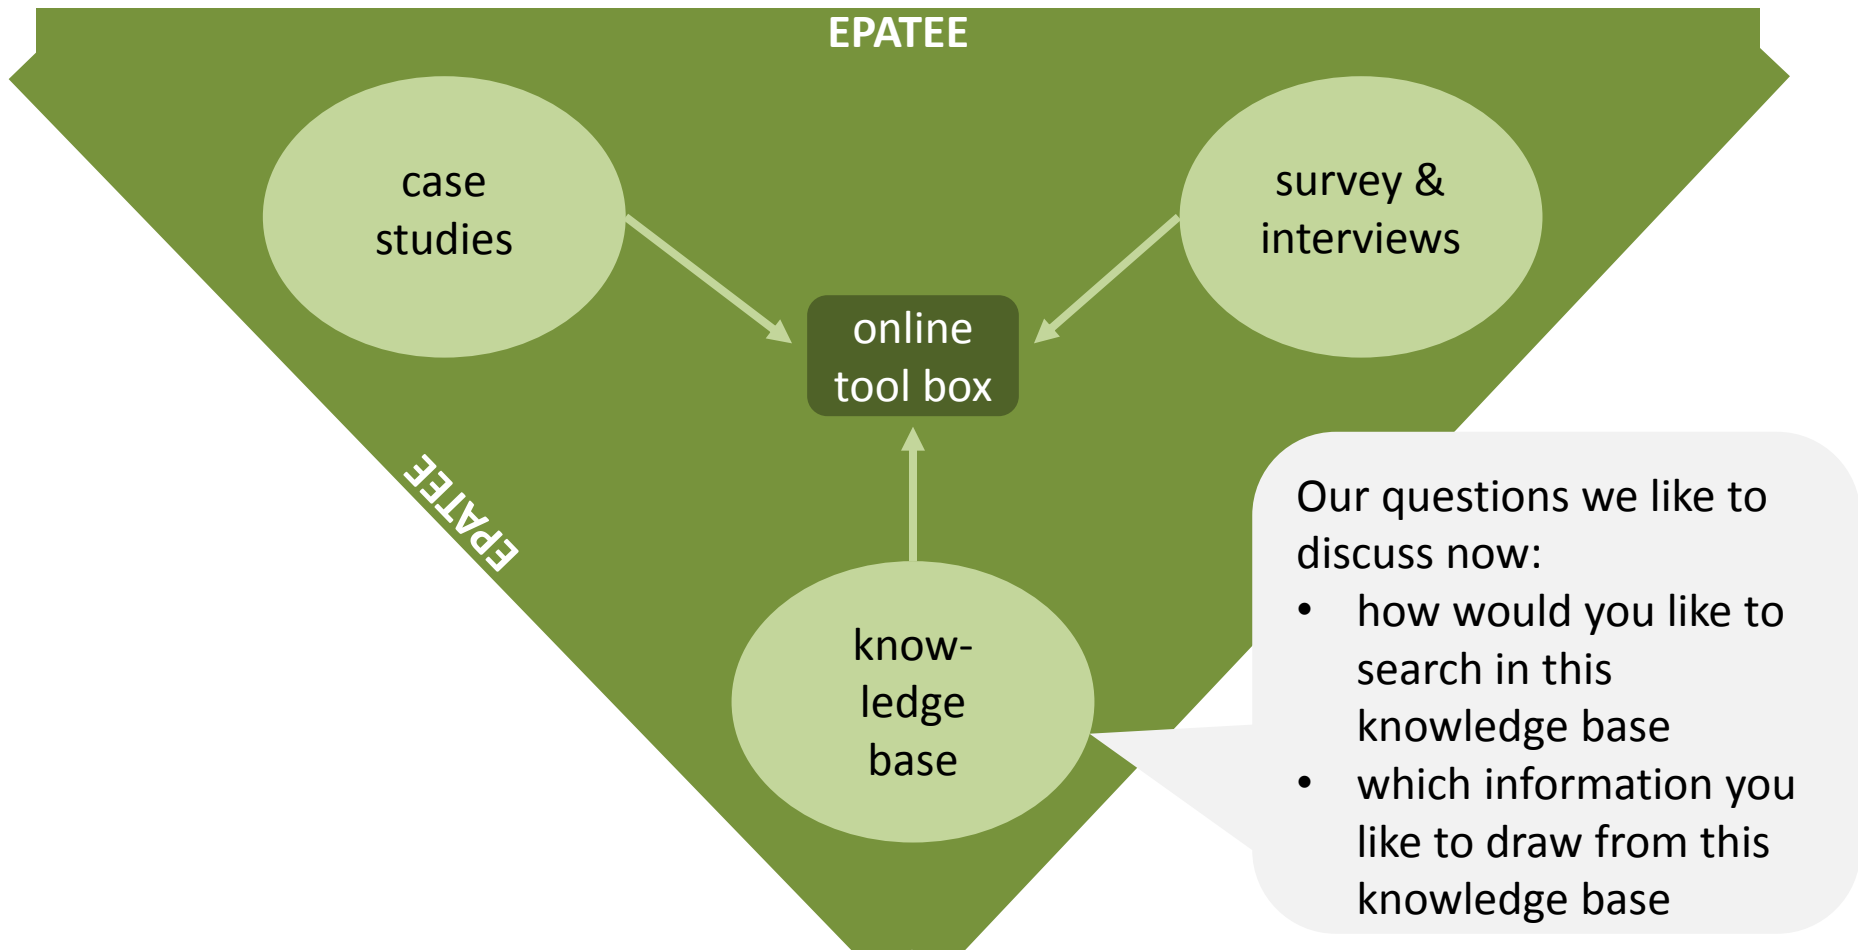

Literature Review – Knowledge base

- Knowledge base:
 - What is the knowledge base?
 - collection of evaluation reports, papers, meta-studies, guidelines on evaluation issues, not representative, not exhaustive, could be a living document
 - What is the objective ?
 - make knowledge/experiences available to stakeholders
 - How to get access to these information?
 - this is the topic we like to discuss now!

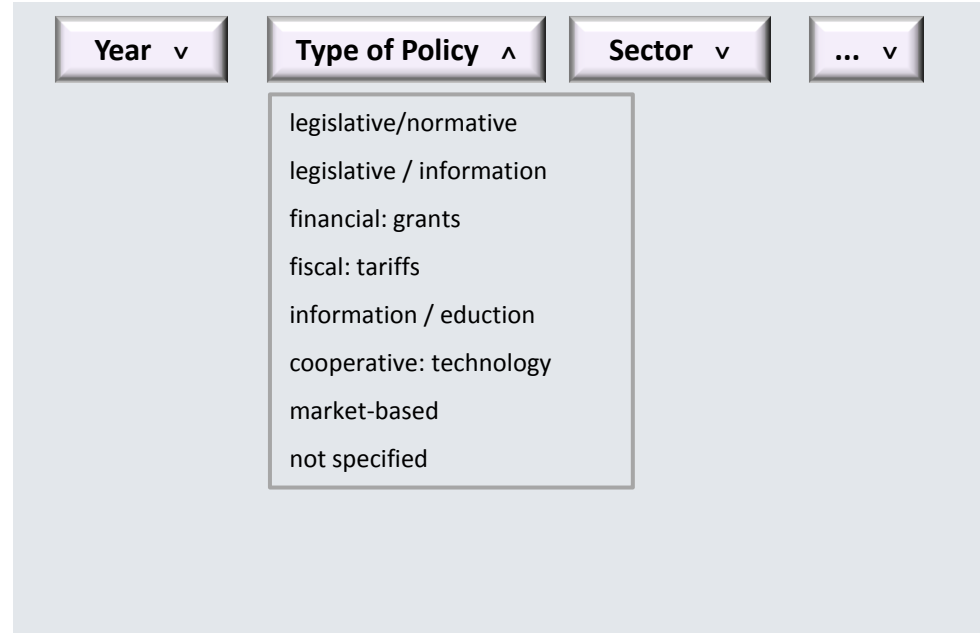

Knowledge base – put into the EPATEE framework

The knowledge base is just one knowledge element of EPATEE, which will feed-in information in an online tool box (as one outcome of the EPATEE project)

Knowledge base – (2) questions

1. How would you like to search in this knowledge base
 - selection criteria with dropdown menu
 - simple search: a selected set of criteria/variables
 - advanced search: based on all variables available in the knowledge base
2. What information you like to get?
 - all or
 - selection ?

The image shows a search interface with four dropdown menus: "Year", "Type of Policy", "Sector", and "...". The "Type of Policy" dropdown is open, displaying a list of options: legislative/normative, legislative / information, financial: grants, fiscal: tariffs, information / education, cooperative: technology, market-based, and not specified.

→ see suggestions

Knowledge base - (3) suggestions

our suggestion of selection criteria:

for simple search:

- type of study
- instrument
 - legislative/normative
 - legislative/informative
 - financial
 -
- sector
 - buildings
 - households
 - industry
 - ...
- geographical scope

for advanced search:

- all criteria

all available information:

- title
- link (www or pdf)
- author/organisation
- date of publication
- language
- geographical scope
- type of study
- objective of evaluation
- instrument
- sector
- data collection
- calculation method
- baseline
- results on energy savings net/gross
- other impacts
- adjustments
- normalisation
- cost data
- uncertainty

Knowledge base – (4) quantitative information

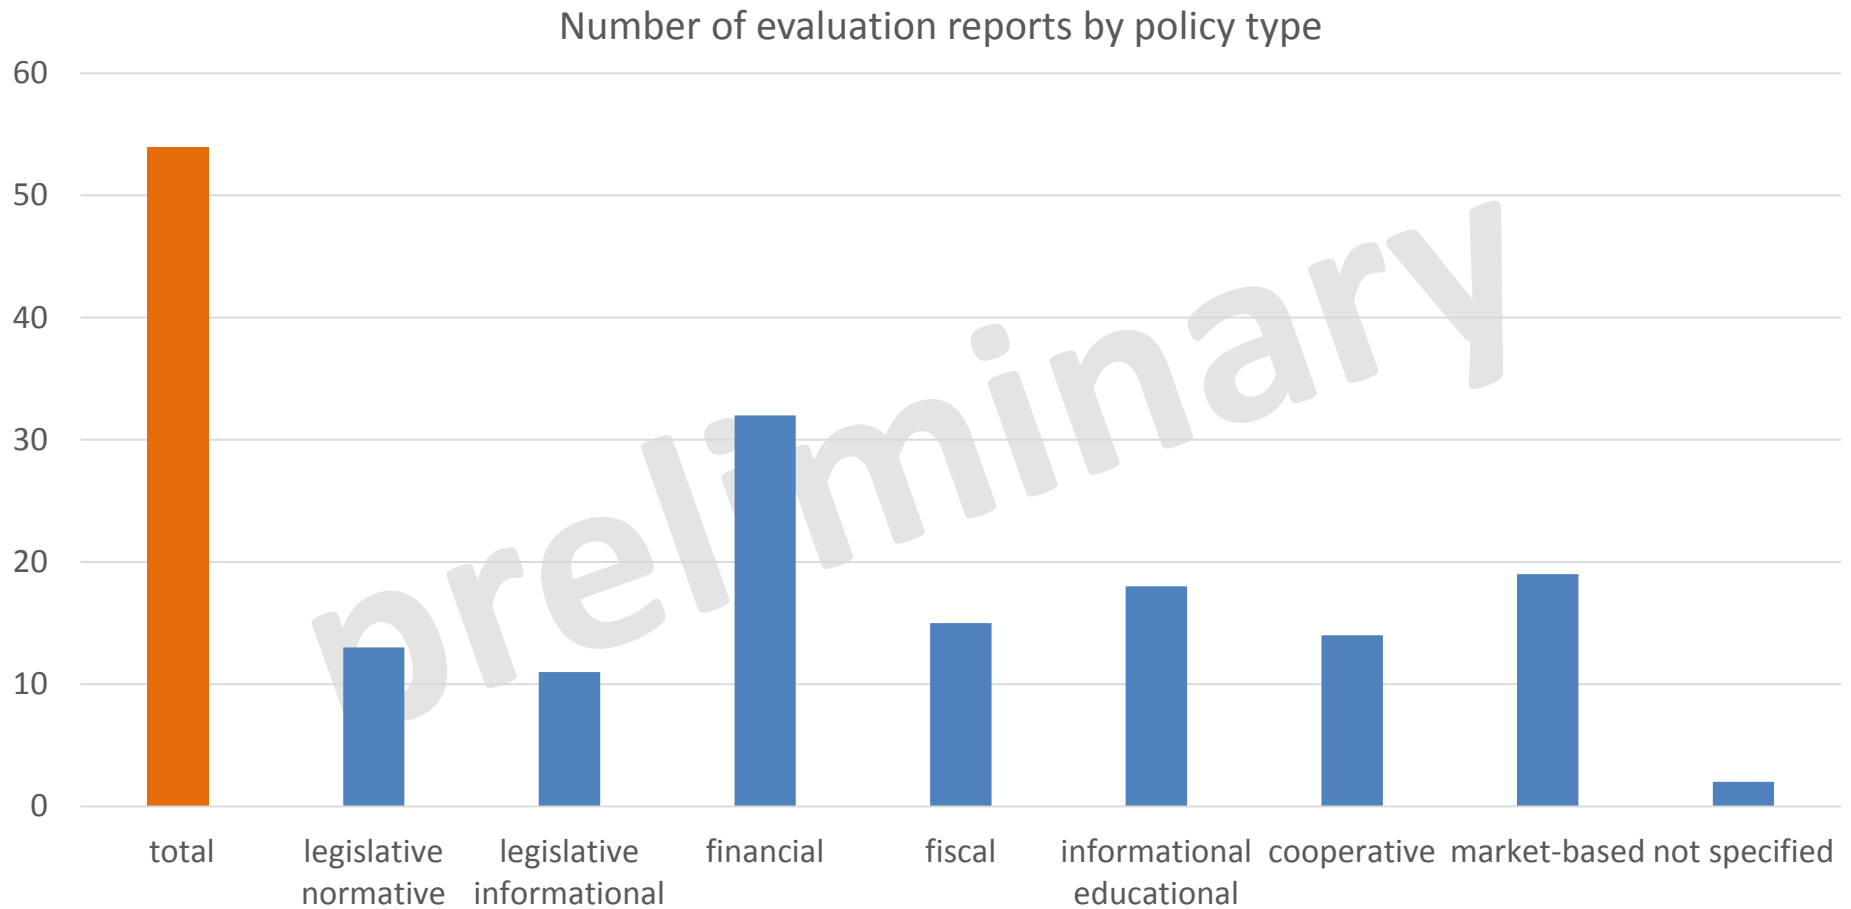

Some numbers on evaluation studies

– *please notice: the knowledge base is not a representative and exhaustive data set on evaluations, but is thought to provide you access to as much studies/experiences as possible!*

- number of evaluation studies by sector
- number of evaluation studies by measure/instrument
- number of evaluations by regions or countries

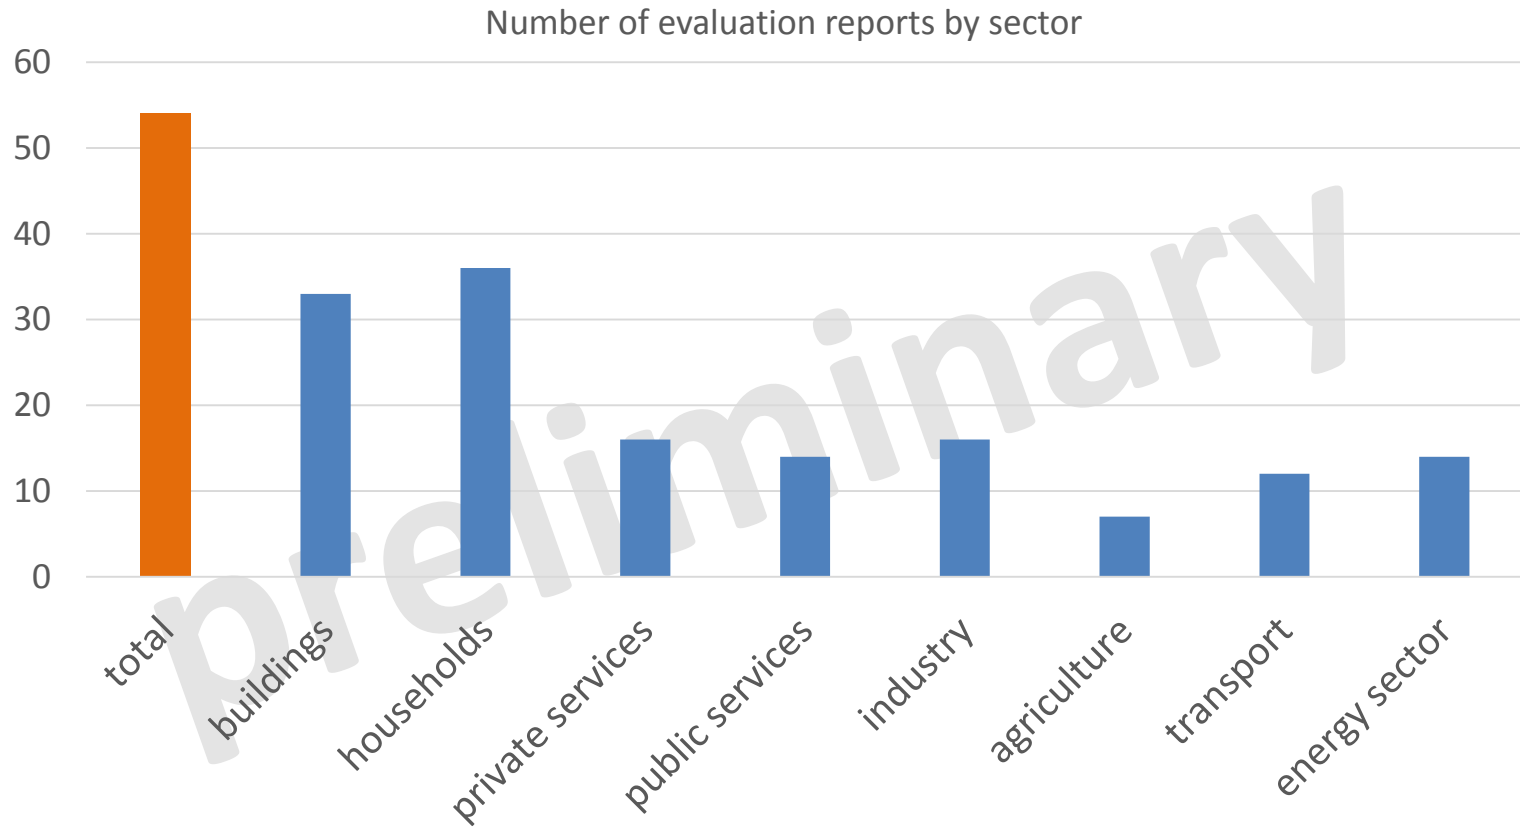

Knowledge base – (4) quantitative information

Knowledge base – (4) quantitative information

Knowledge base – (4) quantitative information

Number of evaluation reports and papers by criteria of analysis
