EPATEE ONLINE TOOLBOX

The online EPATEE Toolbox aims at providing a general guidance on ex-post evaluation of Energy Efficiency policies and a knowledge base giving access to relevant references. In addition, the Toolbox provides specific guidance for practical situations corresponding to Combinations of Policy measure, Sector and calculation Method (PSMC). By guiding users through different menus and filters and thanks to an interactive selection mechanism, each specific guidance describes how to prepare or execute an ex-post impact evaluation, given the needs and possibilities offered by the selected PSMC.

As a result, the Toolbox combines the EPATEE Knowledge Base, general guidance and the PSMCs in a single, publicly accessible and easy-to-use platform.

You will find a more detailed description of the Toolbox and its use in EPATEE webinar #5 [HERE](#).

The Toolbox is now publicly available at: <https://www.epatee-toolbox.eu/>
