

EPATEE

This third EPATEE (Evaluation into Practice to Achieve Targets for Energy Efficiency) newsletter will provide you with an update on recent project activities and what's coming next in 2018.

SAVE THE DATE: 30th of May, 2018 (1.00 pm CEST) next EPATEE webinar!

The first outputs of EPATEE will be presented in a webinar jointly organised with Leonardo Energy and IEPPEC, on Wednesday 30th of May, 2018 from 1.00 to 2.00 pm CEST.

For the details and to sign up (free registration), see:

http://go.leonardo-energy.org/180530IEPPEC09_Join.html

The webinar will be focused on the new online resources for knowledge and experience sharing (see below more details about them in this newsletter):

- a [Knowledge Base](#) that gathers about 170 references evaluation reports and studies on evaluation;
- a set of practical [case studies](#) about evaluations of energy efficiency policies.

In addition the webinar will inform on the main insights on stakeholders' needs and evaluation practices derived so far within the project. The involvement of participants will be ensured by a Q&A session at the end of the webinar.

EPATEE at EUSEW 2018 (7 June, Brussels)

EPATEE will be present at the Policy Conference of the European Sustainable Energy Week in Brussels in June 2018. The respective session on Thursday 7th June 14.00 - 15.30 is a joint event of several H2020 funded projects and will discuss how to improve energy related policy making. For more information on the session see the EUSEW website:

<https://eusew.eu/learning-experience-and-involving-energy-citizens-two-ways-improving-energy-related-policymaking>

Registration to the EUSEW is possible at: <https://eusew.eu/policy-conference-2018>

EPATEE Knowledge Base now available online!

This Knowledge Base encompasses more than 170 evaluation reports, papers, guidebooks or meta-analyses. Its goal is to make resources about evaluation of energy efficiency policies or programs easily available. That's why it gathers references from various sources, and structures them according to the types of reference, policy, sector, evaluation objective, calculation method, adjustment effects taken into account and other criteria.

You can conduct now your own search in the Knowledge Base with your computer, tablet or smartphone thanks to a user-friendly interface:

Access through the EPATEE website: <https://epatee.eu/main-results> and then by clicking on the bullet point "Knowledge Base"

Direct link: <https://www.epatee-lib.eu/>

The screenshot shows the EPATEE search interface. At the top left is the EPATEE logo and a 'SEARCH' button. Below this is a green header 'Search by Categories'. The main search area includes a 'Year of publication' slider from 1984 to 2017, a 'Language' dropdown menu (None selected), and four other dropdown menus: 'Study type', 'Type of policy instrument', 'Sector', and 'Geographical scope', all currently set to 'None selected'. Below these filters is an 'ADVANCED SEARCH' link. At the bottom of the search area are two buttons: 'SEARCH' and 'CLEAR ALL'.

Please feel free to send us your feedback at bf@isi.fraunhofer.de.

Recordings of first experience sharing webinars now available online!

You can find the webinars (presentations and recordings) at the following links on the EPATEE YouTube Channel that took place the 13th March : <https://youtu.be/HryUHR6BFNk> and 20th March <https://youtu.be/O3IR2dET9uY>

2nd EU Peer-Learning workshop in Vienna (25 April 2018)

The 2nd European Peer-Learning Workshop of EPATEE was held on 25th April 2017 in Vienna. The workshop was jointly organised with the OSYSSEE-MURE project and updated on recent results of both projects with a view on policy evaluation. Special focus was put on discussing the multiple benefits of energy efficiency policies. For more information on the presentations and results see the EPATEE website: <https://epatee.eu/events>

15 EPATEE case studies now available

One of the objectives of EPATEE is to provide concrete examples of evaluations, gathering detailed experience feedback about why evaluation is used, how it is performed, what difficulties are encountered, etc.

The case studies include a short description of the policy/programme evaluated, the main data available (means, outputs, energy savings), a concise description of the evaluation method, and an interview with the evaluation customer or the evaluator about a qualitative experience feedback on the evaluation.

15 case studies are already available on the EPATEE website, together with two short documents introducing the case studies and the terminology used: <https://epatee.eu/case-studies>

Some more case studies will be released this Summer, as shown in the map below.

Overview of EPATEE case studies

If you have comments or suggestions about the case studies, please contact Jean-Sébastien Broc (jsb@ieecp.org).

Results of the second online survey

Getting feedbacks from stakeholders is at the heart EPATEE, to ensure that we meet stakeholders' expectations and priorities.

A second online survey was thus done in February 2018. Its objectives were to get 1) suggestions and priorities in view of the development of the EPATEE online toolbox, and 2) to get suggestions and feedbacks about the issue of integrating evaluation into the policy cycle.

More than 100 answers were received from 19 countries (including 3 non-EU country: Japan, Switzerland and US). They have been compiled and will be used for the next step of the project. Download the report at: <https://epatee.eu/main-results>

You can also download at the same page the previous report about the first online survey.

Meet EPATEE in June at C4E Forum and IEPPEC 2018

- **C4E (Central & Eastern European Energy Efficiency Forum): 13-16 June 2018 in Serock (Poland)**

The main aim of the C4E Forum is to build and strengthen Central and Eastern Europe's energy efficiency community. The event will welcome once again a mix of participants from governments, the public sector, NGOs, civil society and business and is aiming at 240+ participants.

On Friday 15 June (9.00-10.30 am), a panel will be dedicated to "*Monitoring and evaluation of programmes and policies*" where EPATEE will be presented by Lovorko Maric (EIHP - Energy Institute Hrvoje Pozar).

For more details about this conference, see: <http://c4eforum.net/>

- **IEPPEC (International Energy Policies & Programmes Evaluation Conference): 25-27 June 2018 in Vienna (Austria)**

The theme of this year's conference is "2020 is tomorrow. Are we ready?"

The conference aims at exchanging new ideas, inputs for current and upcoming debates, experience, feedback, and lessons learnt about all the stages of evaluations.

The various sessions will explore how evaluation work can tell us about whether we are on track to achieve 2020 targets. They will also provide concrete examples about how evaluations can help upgrade policies and programmes to ensure that targets will be achieved in 2020 and beyond.

The following presentations will be made by EPATEE partners:

- ✓ What Can We Learn from Sharing Experience About Evaluation Practices? by Jean-Sébastien Broc (IEECP - Institute for a European Energy & Climate Policy)
- ✓ White Certificates in Italy: Lessons Learnt Over 12 Years of Evaluation, by Dario Di Santo (FIRE - Italian Federation for Energy Efficiency)
- ✓ Subsidy scheme for energy savings in social housing of Amsterdam, by Jamilja van der Meulen and Robin Niessink (TNO)
- ✓ Accounting of Energy Savings in Policy Evaluation — How to Get at Least 8 Different (Correct!) Results from the Same Data, by Fabian Voswinkel (Fraunhofer ISI)
- ✓ How Relevant are Free-Rider Effects for Target Achievement? By Barbara Breitschopf (Fraunhofer ISI)
- ✓ Setting Benchmarks based on a European Energy Efficiency Scoreboard for Europe, by Barbara Schlomann (Fraunhofer ISI)
- ✓

Conference programme, registration and all the details are available at: www.ieppec.org

Looking forward to meeting you there!
