

NEWSLETTER - October 2019

EPATEE

Evaluation into Practice to Achieve Targets for Energy Efficiency

This 7th (and last) EPATEE newsletter will provide you with an update on recent project activities and on the future of the EPATEE outputs beyond the project itself.

RECENT EVENTS	
Wednesday 10 July	Task Force Meeting - Mobilising the efforts to reach EE targets
Thursday 12 September	European Commission Evaluation Workshop
Thursday 19 September	EPATEE Final Conference
Friday 18 October	Concerted Action EED
THE END OF EPATEE	
Continued exchange beyond the project	
<p>Thanks and goodbyes to all contributors and participants</p> <p>We thank you very much for the interest you have shown along the EPATEE project. We hope that the projects and initiatives mentioned above will provide you with further resources, and with new opportunities to meet with the experts who were involved in EPATEE!</p>	

RECENT EVENTS

TASK FORCE MEETING MOBILISING EFFORTS TO REACH EE TARGETS

WEDNESDAY 10 JULY 2019 | Brussels

On the 10th of July 2019, Gregor Thenius (AEA) presented the main learnings from EPATEE to Member States' representatives at the 3rd Meeting of the Task Force on Mobilising Efforts to Reach the EU Energy Efficiency Targets for 2020, organised in Brussels by the European Commission.

The presentation is available on the [EPATEE website](#).

EPATEE at EC Evaluation Workshop

THURSDAY 12 SEPTEMBER 2019 | Brussels

The EPATEE project was invited to present lessons learnt from the project at an internal workshop of the European Commission (DG ENER) about evaluation of energy efficiency policies.

The presentation is available on the [EPATEE website](#).

EPATEE FINAL CONFERENCE

THURSDAY 19 SEPTEMBER 2019 – 09:30 to 14:00 | Paris

The EPATEE Final European Peer-Learning Workshop took place in Paris on the 19th of September 2019 and covered the topic: **“What can we learn from existing evaluation practices?”**

The aim of EPATEE's final conference was **to present the conclusion of the project** as well as to provide a platform for stakeholders to exchange knowledge and discuss existing practices on the **evaluation of energy efficiency policies** in order to establish an energy efficiency evaluation community. The conference serves at achieving one of EPATEE's main targets: **to enable user-oriented experience sharing and capacity building**.

The agenda of the conference focused on:

- The main conclusions of EPATEE
 - Why evaluation matters
 - Key lessons learnt to improve evaluations and policies
- Presentations of hands-on experiences by evaluation experts
- A panel discussion with different stakeholders and evaluation experts
- A poster session showcasing the main tools and outputs of EPATEE

You can find the presentations and proceedings of this workshop on the [EPATEE website](#).

EPATEE at Concerted Action EED

FRIDAY 18 OCTOBER 2019 | Zagreb

On 18th October 2019 the final results and outputs of EPATEE were presented at the 5th Plenary Meeting of the Concerted Action EED (CA EED) in Zagreb. Held by Lovorko Maric (EIHP), the presentation aimed at making policy makers aware of the project results and highlighting the availability of the EPATEE outputs in the future.

The CA EED serves Member States to discuss and exchange experience on the implementation of the EED, see [here](#).

You can find the presentations and proceedings of this workshop on the [EPATEE website](#).

CONTINUED EXCHANGE BEYOND THE PROJECT

EXPERIENCE SHARING ABOUT EVALUATION PRACTICES WILL CONTINUE AFTER THE END OF THE PROJECT!

The EPATEE project will officially be completed at the end of October 2019. However, the dynamic to develop evaluation practices and related experience sharing does not stop.

The **EPATEE website** will remain available at least until October 2021

The **Knowledge Base** and the **Online Toolbox** will continue to be hosted respectively by Fraunhofer ISI and TNO. Their current URL will be kept. A new access to them will also be created as part of the next update of the [ODYSSEE-MURE](#) website. This other Horizon 2020 project has already a long history and its website has a large audience, ensuring a renewed visibility for the EPATEE tools and their dissemination.

The **webinars** will continue to be available on Youtube. Their descriptions and the presentation files have been included in the resources of the [Energy Evaluation website](#). Similarly to ODYSSEE-MURE, this will ensure a renewed visibility for the EPATEE webinars.

The **case studies**, currently available on the EPATEE website and in the Online Toolbox, should also be soon available on [E3P](#), the European Energy Efficiency Platform, operated by the JRC.

In parallel, to ensuring the availability and visibility of the resources developed by EPATEE, another important point to maintain the dynamic is that other projects or initiatives can offer forums to continue the exchanges and discussions initiated along the EPATEE project:

- The Concerted Action EED ([CA EED](#)) through its Domain 1 about *“Planning, monitoring and verification and savings calculations”*
- The ODYSSEE-MURE project that includes a [facility about impact evaluations](#), and organizes [workshops and training sessions](#)
- The association Energy Evaluation (formerly IEPPEC), whose activities are focused on promoting the evaluation of energy efficiency policies: a conference in Europe every two

years, a [series of webinars](#) jointly organized with Leonardo Energy, a [website](#) including the proceedings of the previous conferences and webinars.

If you are interested in evaluation, the next [Energy Evaluation Europe conference](#) will be held in London on 29 June to 1 July 2020. If you are interested in being informed about these activities, you can register to the Energy Evaluation news [here](#).

The EPATEE project has also highlighted the strong link between evaluation and monitoring. If you are interested in experience sharing about monitoring practices, you can follow the recently started [ENSMOV](#) project.

We thank you very much for the interest you have shown along the EPATEE project. And we hope that the projects and initiatives mentioned above will provide you with further resources, and with new opportunities to meet with the experts who were involved in EPATEE!
